

英語構文課題8(関係詞を中心に)

第1問 和訳せよ(基礎の確認)

1. What many people believe is harmless may in fact have serious consequences.
2. The scientist who we once thought had solved the problem later admitted that his theory was incomplete.
3. The committee postponed the decision, which caused considerable frustration among the applicants.
4. However convincing the explanation may sound, it does not remove the need for further evidence.

第2問 和訳せよ。

1. The debate over remote work has revealed the extent to which modern companies depend not only on technology but also on informal communication among employees.
2. In medical research, this is the case where a treatment that appears effective in a small experiment does not produce the same results when it is tested on a much larger group of patients.

第3問 和訳せよ

Many people are attracted to stories that describe worlds very different from their own. A novel in which ordinary people face unfamiliar problems can help readers see their own lives from a new angle. Characters who make difficult choices often reveal values that we do not notice in everyday life. This is why literature, which may seem far removed from practical concerns, can still influence the way we understand other people. A person who has experienced many different lives through books may become more willing to listen to voices unlike his or her own.

第4問 和訳せよ。

people now live in digital spaces where approval is measured by numbers that can be seen immediately by others. The opinions which users believe they have formed independently are often shaped by algorithms whose influence remains largely invisible. A person who is constantly exposed to views that resemble his own may gradually lose the ability to understand why others think differently. This is one reason why social media, which appears to expand our access to information, can sometimes narrow the range of ideas with which we seriously engage. What makes this problem difficult is that the systems which encourage such behavior are designed to feel convenient rather than restrictive.
